

How 2 tint/shade

- if u color w/ pen ✓
- an original tutorial ✓
- (I think) ✓

1. get a blank lineart
(+ group it)

set aside

Set aside another lineart w/ just outline

2. Duplicate and add line.
then group that

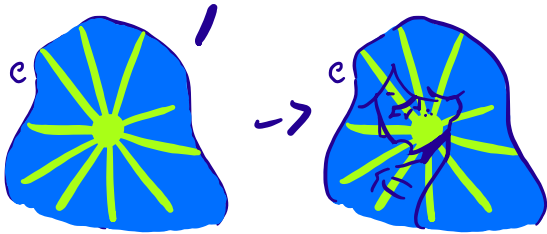

4 later

3. Color in.
then add lineart 1
on top of deleting
lineart 2

4. Use the outline lineart
and fill w/ highlighter

Stay in lines!

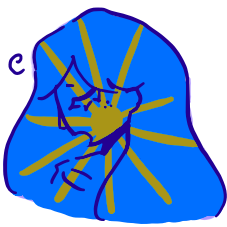

Nothing inside adds less likely holes

Then delete the lineart, and duplicate highlight to max overlap

5. Add on top
and tada!

Group when done

Has 2 bc grouped 2 work!

4 specific areas:

Experiment w/ the color!
