

Nonono, lady_scorpion I think you have it a bit wrong. This doesn't seem traced to me, Kadence's looks different, and not just the outfit. The body structure is different too, it isn't a replica. I posted a tutorial on how to draw in my art style, and it just looks like she followed it with this one. She does have some of my traced art on her profile, but this isn't one of them.

Looking at that now, yah i do think she did use the tut, sorry ;-; (kinda embarrassed rn) oop-

Kadence! Pls stop posting rxsie's art, that you remixed & traced! We can all see you traced. Stop defendign yourself saying you didn't trace. Look. This is rxsie's next to yours
