

Wanna see how compatible you are w/ someone? Try dis! Not fully accurate but it's funni

1. Write the 2 people's names like this (I'm using two random names)

Jay
Elijah

2. Cross out letters that are the same and write how many of each letter there is (like in this example the names have 3 "a"s together so you'd do a 3)

Jay
Elijah

3. Continue doing step 2 but for each letter :)

Jay
Elijah
2 2 1 1 1 1 1

4. Add the numbers on the end together, you should get smth like this

Elijah
Jay
2 2 1 1 1 1 1
~~4 4 2 2 2 2 2~~

3 3 2 1

5. Keep adding until there's 2 numbers left

Jay
Elijah

3 3 2 1
4 5

This would be final product, these 2 names have a 75% compatibility ^_^

45%
