

how to draw

this.
← (suggested by void)
(i think!)

now to draw
the base:

1.
get the base
shape figured
out

add
the
pupil,
too

2.
add the first
color. I recommend
opposites for this.
warm colors always
go on the bottom

3.
add the
shading for
the first color

4.
add the second
color

overlap
the two
colors!

5.
add the shading
for the
second color

6.
add the
shadows
*i recommend
a light
color first*

some eye colors
go better with
some skin
colors

7.
add the second shadow
and skin color

8.
add lashes (lashes are
black + the skin color)

9.
add the silly
white lines
