

Ok I'm going to let my keyboard decide what to say...

Ok this is my keyboard:

1. P I just want to know what to say about it and what I should say in the a little bit more detail about what to do with if I want something to be honest with the question and what not to say about that particular keyboard and what I want can I get the answer I want to ask for the answers to this problem question 🤖 and what do I need to do to with it as I don't have a problem with it the answer is I don't have to ask ask the answer I have no problems so if someone can just give them my opinion is to say no I have a a problem with it is that I don't want to be honest with them to
