

hello everyone, guess who's 119€ (yes euros)
worth of one Apple pencil just arrived?!
Oh yeah, mine.

im still learning about the new features this
bad boy has, cuz as you know it's gen. 2
cuz i have the newest (Ipad ...

so there are obv new features my knock-
-off didn't have!!

Basically:

i could'nt do this →  pressure thing lol

also i can now double tap on the apple pencil
& it'll switch from my pen 2 the eraser

or charge it while it's clipped on my Ipad's idk.

what the knockoff couldn't do was let the palm
be on the screen while drawing (but it's just
something normal for knockoffs anyways)

and it's not broken etc. etc.
