

So ive Seen a lot of notes saying that notability is being locked. And I know a lot of you want to stay in contact with the people you met on here. So I'm making a google doc where everyone can stay in contact with one another. If you put your email in a post, I'll add you to it. I'm not putting the link out because I don't want random people ruining the doc and that stuff. So you can put your email in the comments or in a post with a picture and tag me and I'll add you to the doc
