HOW THEY MET...

Lane and River both live in Australia. They attend the same school and first met when Lane ran straight into River after being chased by her close friend Janet. As Lane is rather large she easily knocked River from her feet. River being slightly condescending to Lane because she viewed her as stupid, acted rudely. This whole event caused both River and Lane to hate each other greatly despite the attraction they felt. If anything, because River viewed herself as straight at the time she hated Lane all the more. Lane confided her feelings about River to Janet. Janet had a lot of friends and had heard through the grapevine that River felt the same way. Janet decided to play matchmaker and constantly set up scenarios where they were forced to hang out - group projects, school play, sport, hpe, art, etc. Eventually their hate eased and they became each other's closest friends. On the athletics carnival River and Lane were pushed accidentally, falling squarely on top of each other. Sparks flew. They went to the nurse's office and from there their relationship only evolved.
