

Welcome

to Notability

Powerful, yet wonderfully simple note taking.

Take a quick tour, and discover the creative power of Notability.

To scroll through a note, use the **Navigate** tool in the toolbar. If another tool is selected, use two fingers to scroll up or down.

Note Everything!

Type with ease

To type, tap **T** in the top toolbar and then tap anywhere in the note to begin typing on a new line.

You can also place text anywhere by using text boxes. Tap and hold on any blank area of the note to add a text box.

Above the keyboard is the typing toolbar where you will find tools for:

- Changing font, style, color, and size
- Outlining with bullets or numbers

Photos bring notes to life

Quickly capture information and remember what's important with photos.

Supersize me

Try this: Change the size of the surfboard photo.

1. Tap on the T in the top toolbar.
2. Use 2 fingers to tap on the photo to select it.
3. Tap and drag on a blue handle to scale the photo.

Capture a moment

To add a photo, tap **+** in the top toolbar and then either take a photo or select one from your photo library.

Try this: Import a photo and drag it into the frame below.

place a photo in the frame

Did you know? You can **handwrite** directly on photos.

Smooth beautiful ink

The **Pencil** will quickly become your favorite note-taking tool. To write something, tap the **Pencil** tool and start writing. Tap the **Pencil** a second time to change color or line weight.

Use the **Eraser** to erase anything you draw or use **Undo** to go back one step at a time.

Highlight what matters

The **Highlighter** is a versatile tool that helps you emphasize the most important parts of a note and create beautiful sketches.

Try this: Use the highlighter to layer 2 different colors on the surfboard like the illustration below.

Remember to change back to the **Navigate** tool to avoid making stray marks on your notes while scrolling.

You've got style

The Lasso tool is both powerful and versatile.

Tap the **Lasso** tool and use it to select a drawing or handwriting. Tap again to reveal the rectangular lasso option. Draw a freeform outline or a box around your desired selection.

Move: Place your finger or stylus within the selection and drag to move the selected drawing.

Scale: Pinch to scale the drawing, or use the rectangular lasso tool to create a bounding box. Drag on the corners of the bounding box to scale with more precision.

Rotate: Tilt two fingers to rotate selected elements or use the handle on the bounding box to rotate with more precision.

Cut, Copy, and Paste: Tap once inside the selection outline to display a popover with options to Style, Cut, Copy, or Delete the selected drawing.

Once you copy a drawing, tap and hold in the note to **Paste** it somewhere new.

Listen carefully

Audio recordings help you get more out of your meetings and lectures by capturing every important detail.

Note Replay: Audio recordings will automatically link to any notes that you take while recording. During playback, tap a word, sketch, or photo to hear what was said at that exact moment.

1. Tap the **Microphone** in the top toolbar to begin recording. Tap the microphone again to stop recording.

2. Tap the down arrow next to the **Microphone** to open the playback bar.

3. Tap **Play** to listen to the audio and watch your note unfold.

It all comes together

Easily combine text, handwriting, drawing and photos to create powerful notes.

It's time to explore and make some notes!

Tap < in the top toolbar to view your Library, and then tap **Compose** to start your very first note!
