

Birds

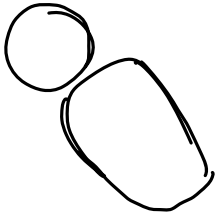

yes. bird

They come in a billion styles

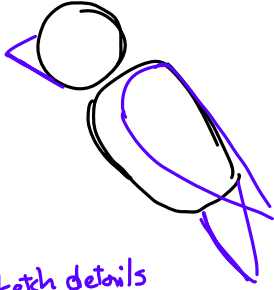

This is a problem when making a tutorial

these are the most fun

head & tail

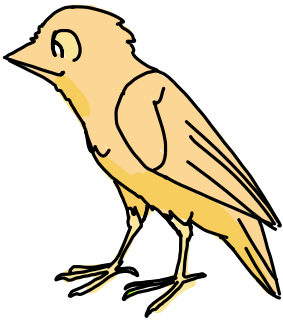

beak, wings, tail

sketch details

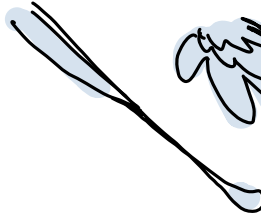

outline and color

Heads

Tails

Wings

This only works for certain styles so do try your own methods

bigger birds have different wings

I'm going to do another tutorial on just wings

Birds from straight on are really hard to draw, so do them from an angle
