

How 2 stretch things out on  
**NOTABILITY**  
with Nick!!

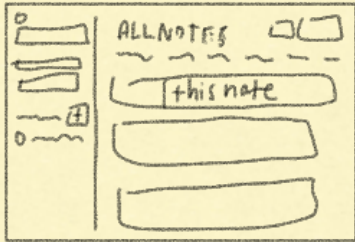

① First, draw the part you want stretched out

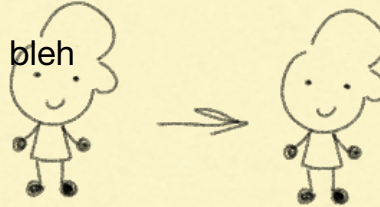

② Then, draw a text box over your drawing, and type anything in it.

③ Then leave the note

④ Then come back to the note, select the text box, and delete whatever you typed

⑤ then, select the text box again and move the little dots to make it stretch!!

**Bonus** If you want to make it unnoticeable that you stretched it, select the drawing, press "Style", and set the stroke to your desired number!

Also works in highlighter & pen!

That's how YOU STRETCH on Notability!!

This is also helpful with:  
Short legs u want longer  
Eyes that just don't look too right  
ETC.
