Original

original mine

here's a sketch of the legs I would make. you can trace over it

feet placement is staggered to show depth

slight lean forward

Calves and thighs form the curves. knees connect

slight turn out

ovals help place curves

my biggest recommendation is to reference but don't trace. References will show you what other artists know looks good

Just search for images with "(subject) reference"

simple ovals can be used for a quick sketch
