Fun Facts -

- worked along side N, J, V, & and other drones at the mansion before becoming murder drones.
- Was the first worker drone to be build into a murder drone so basically like a test.
- He ended up being considered, "defective" & "lethal" because he would not only go into killing procedures for worker drones but any 'living' object (yeah including humans...)
- So they decided to basically break him apart and get rid of him.
- They couldn't really do that so they ended up doing factory reset and locking him down in the basement with you know what.
- A while passed and you know blah blah blah humans sorta die and robot apocalypse 😊
- No here is were my friends OC comes in and she basically finds E and makes him not dead anymore!
- Since he was re-set now he is back to his normal happy go lucky bean self, but you know still murderous
- And so yeah after that they just kinda roam around as two killer robots!
- ITS CANNON HE ONLY SURVIVES OFF OF WAFFLES AND THE BLOOD OF HIS ENEMIES 🤩
- He loves waffles 🍩 (y idk... it just seems like a him thing)
