

Experiment: A-213
a combination
of multiple
experiments.

Experiments include:
C-20A, Y-2AB, B-51I,
and I-NIK and others

Behavior: A-213 has been sitting
in the corner of his cell. When in the
courtyard A-213 won't socialize with the
others.

A-213 can change his preference to
things that he has seen. He can also mimic
voices. As a result personnel must have
a chip implanted in them to leave/enter
the facility.
