

Solar eclipses look very cool
and they're a great way to
show that there is a creator!
God!

God created the sun and the moon
perfectly so that moon covers the bright
part of the sun, leaving the corona by
itself. This is a very convenient condition for
scientists to study the corona. The moon and
sun appear to be the same size because the
sun is 400 times larger than the moon but
the sun is 400 times further away. There
is no way this is a coincidence! There is
even a bible verse about this, Psalm 19:1!

If you were in Texas you saw this, a solar eclipse in totality:

If you were in California you saw this, a partial solar eclipse:
