

Wanna see how compatible you are w/ someone? Try dis! Not fully accurate but it's funni

1. Write the 2 people's names like this (I'm using two random names)

Abigail  
Jayden

2. Cross out letters that are the same and write how many of each letter there is (like in this example the names have 3 "a"s together so you'd do a 3)

~~Abigail~~  
~~Jayden~~  
3

3. Continue doing step 2 but for each letter :)

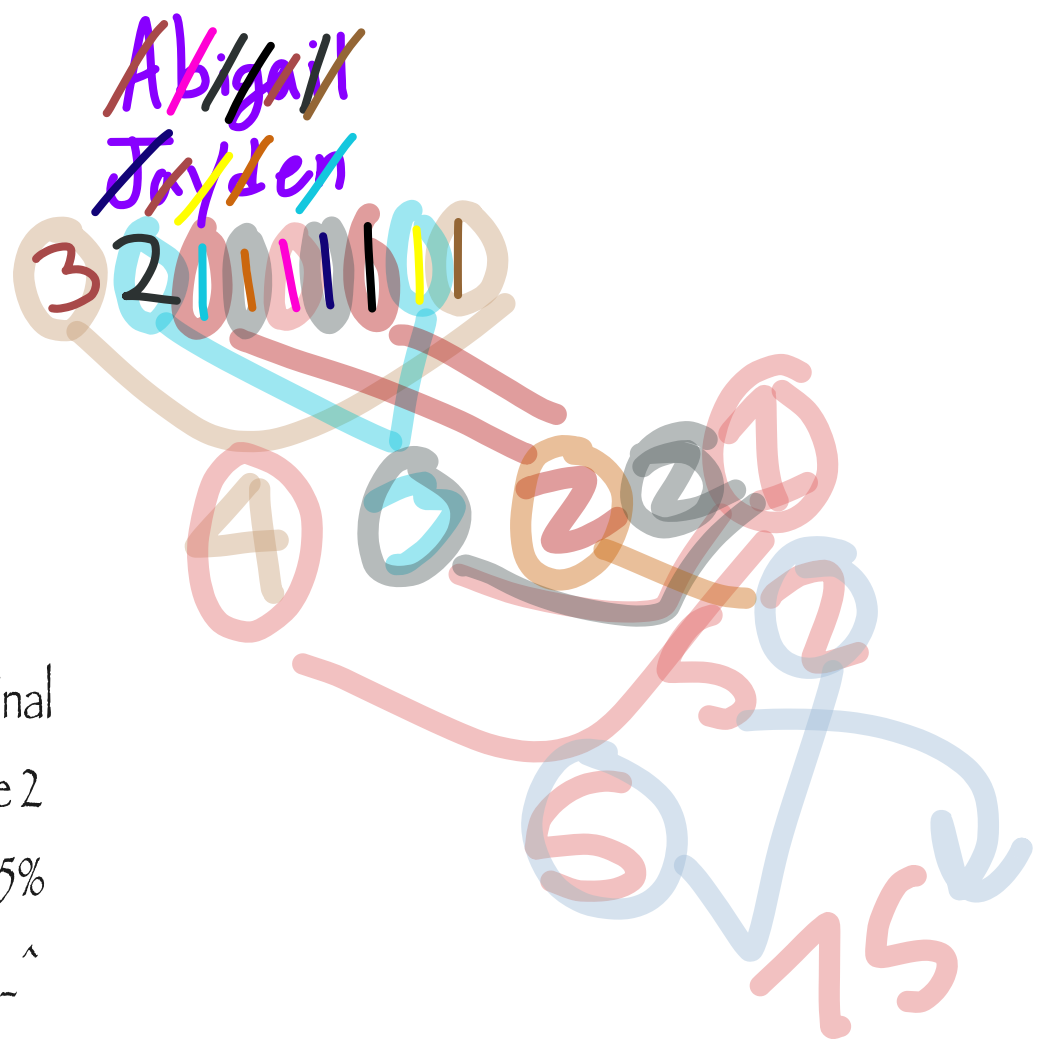

~~Abigail~~  
~~Jayden~~  
3 2 | | | | | |

4. Add the numbers on the end together, you should get smth like this

~~Abigail~~  
~~Jayden~~  
3 2 | | | | | |

4 3 2 2 1

5. Keep adding until there's 2 numbers left

This would be final product, these 2 names have a 75% compatibility ^\_^

75%
