

The sun's going down
As I try to make my way through the crowd
Feeling alive, I love being by your side
It makes me shine
We got one summer so let's make it count
You make me feel like everything's all right
Let's dance our problems away in the night
Love being right next to you
You'll be on my mind
I'll be dreaming about this 'til the end of time
We are young, we are free, down for the ride
It might be over tomorrow but we got to stay forever
Do you hear that sound?
Can you feel the music, let's get wild?
We're magic you and I
[They call us reckless?] but we don't mind
We got one summer so let's make it count
You make me feel like everything's all right
Let's dance our problems away in the night
Love being right next to you
You'll be on my mind
I'll be dreaming about this 'til the end of time
We are young, we are free, down for the ride
It might be over tomorrow but we got to stay forever
Yeah, we got the summer forever
If it's only for now, I don't mind
'Cause I know that your love is endless
If it's only for now, I don't mind
'Cause I know that your love is endless
It might be over tomorrow but this day will live on forever
You'll be on my mind
I'll be dreaming about this 'til the end of time
We are young, we are free, down for the ride
It might be over tomorrow but we got to stay forever
Live on, live on forever
