

Sorry guys.. I haven't been posting lately. I've been obsessed with band lab but now I wanna delete myself from existence. Some not smart person got it banned and now, I can't vent to anyone, my only form to the outside world is gone, along with my 100 followers. My account was @pixie_purr and I loved every minute of having that community but not anymore. If y'all have a acc and want to mention me in it and let people know I can't post anymore, go ahead but I ht everything now. my life has been shattered in two and I've been left in the ruins. Recently my family found out about me being a therian and freaked out and then started trying to gaslight me and discriminate. I was crushed. But after a while I started recovering after talking to people who understood me and what I was going through but it shattered again and I don't know how I'm going to recover this time since people aren't there. I'm trapped in my house every day, and I can only go to the backyard. I've had plenty of thoughts of running away and I might go through with it. But I'm just terrified now, and don't know what to do.
