

Dear, everyone

there is this "war of tracers and anti tracers" and there is "@sierramudd1" which I believe she might be pregnant with baby flora but however I looked at her old posts which had remixes some she said wasn't hers but some she didn't even credit. The anti-tracers told her she traced or copied but she denies but I think she should be honest. She said she is stressed. I believe her. So I think she should tell the truth. So her stress will come to an end.
