

If someone wants one of these oc's to use, be my guest. If two people want the same one decide between yourselves because I can't actually go on to notability to see stuff, only post. The name and powers can be switched, these are only recommendations. (Sorry for the bad drawings, you can remake them but these are just kind of basic ideas for oc's that you can use as a idea book for something cooler or a blueprint and recreate in the same way. And as always blur isn't here cause he is my main oc I actually use.)
