

How to make  
your own  
stickers!

(Tutorial)

by pluffy2134

# Materials

Normal tape (Scotch tape,  
duct tape, etc.)

Scissors

Ziploc bag, wax paper,  
or baking paper (all  
of them work)

First, find something  
that you want to  
make a sticker.

You can draw it  
or print out smth.

Cut it out.

After that, grab  
w/ Ziploc bag, wax  
paper or baking paper  
and cover it with  
tape. The amount of  
space you cover depends  
on the size of the  
sticker.

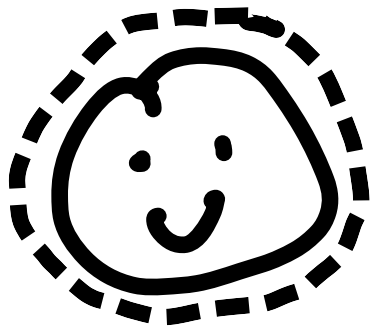

Put the thing you  
drew or printed out  
on the tape and  
cover that with  
tape.

Rip it off, trim  
it and your done!

Make sure to leave  
a small border of

tape. ↓

----- = tape

If you have any  
questions, just  
leave it in the  
comments!
