

whats stuck in my head 24\7:

Five Long Nights (JT Music)

I just picked up a new job, but im hoping it ain't hard after all its a night shift i'll be working the graveyard, urban legends inside, think ill be fine, theres no way these things are alive! its just a robot with nothing inside! right? not like im fighting to survive! Just heard a noise bonny is gone honestly my skin is starting to crawl something is coming, theyre walking the halls and now that my battery's starting to crawl im sick of seeing all the sinister faces! why am I working for minimum wage? if i could be killed, they should give me a raise! why did they hire me? this is insane!

.Enjoy your five long nights. kick back and grab a slice. if you get hurt on the job, we can not cover your loss! just get to six and youll be fine!
