HOW zephyr came to be

I actually made zephyr by complete accident I was just drawing circles one day then I remembered tails from sonic the hedgehog so I tried making him look like tails. But I wanted to make my own tails from an alternate reality he was supposed to be older and edgier but I got rid of that idea except the design I loved it to much and so I turned him into his own character:3 now he's gone through a couple of redesigns but the one on top is his official design.
And ever since then zephyr has been my main OC:3

How daisy came to be

Daisy is one of my oldest and most used Oc I have. I created her when I found out I was a furry and I went onto YouTube about furries and found a furry species called airplane dragons:3 so I decided to draw her.
She's my comfort oc when I feel silly or want to draw something she usually is my first go to Oc. her pink suit and vibrant personality always lifts my spirits 😊

HOW SPARKIE

came
to be

Here's my first ever Oc! We all know him we all love him its SPARKIE!!!
I made sparkie as I love dragons so much and he was my first drawing:3

Sparkie was my first ever Oc everything about him is completely originals with the colors to his backstory he's just my Oc:3 he was my main Oc I have used for the longest time I loved drawing his adventures I loved everything about him and still do!   I may not use him much anymore but he will always have a place in my heart and in my drawings 🥰

How
Rose &
Kira

Kira/rose are based off of Seele from honkai impact 3rd:3
And one day I ask you guys what should be a base for a new Oc and someone said a blue dragon so I started working on it and Kira was made now here's where Seele played a part of this.
I later came up with an idea of an evil spirit or alter ego being in the same body making this technically two characters in one:3

Sorry for bad drawing
