

- Predators

- target low-poison-newts

- leaves high-poison-newts alone

Snakes

Why did the
newt population
get more
poisonous over
time?

#1

- level 1 reproducing less

- level 10 reproducing more

50 gen → level 1

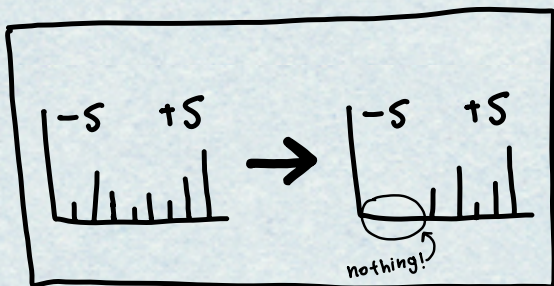

Now → level 10

#2

- low-poison died out

- high-poison newts survived

- adaptive/non-adaptive

#3

- Avoid eating high poison newts

- Eats low-poison newts

Snakes smell/taste TTX

#4
