

So I told y'all I'll post soon. This is the first part of my Pokémon Violet Nuzlocke, I would play more but my god this isn't going well as forwarning.

I chose Sprigatito and named him Hemlock and then on the first route I caught Tapestry the Fletchling and destroyed Arven with Hemlock. On the next route I got Tulip the Ralts.

Route three got tricky. I was training up Tulip and she got one hit fruit by a Shroodle's bite. The first death. I was so mad because I was so excited to have a Gardivoir on my team and now my dreams are ruined. I caught the Shroodle anyways and named it Tox!c for killing my plant.

Then the battle with Nemona. Her fricken Pawmi almost killed Hemlock and two shoted Tox!c with a Tera boosted Thunder shock. I am now very salty at Nemona and quit playing because I legit just lost half my team and I'm still not done with the pre game tutorial.

But anyways the next part will be coming out soon and at the rate things are going it's not gonna last long.
