

Proof @mayoi stole art of google.. :)

As you can see right here,, you can see “crop, format,” etc, you can ONLY see those on pictures once u insert them, and i was able to move it around once it showed, and wouldn't it look a bit sketched? And the biggest part is, she stole it without showing she got it off google, pinterest or whatever. You are ABLE to turn it, which means that she took it off google.
