

Not on nobody but is it just me or like then people say they are having a hard time, I'm I only one who absolutely doesn't care, I'll be there like... ok congratulations I don't care. So if y'all are having a hard time like the girl who I was saying traces everything (which she does) and has a baby and is getting stressed because of this app. I don't really care if your upset with me and everyone, be upset what are we going to do. Write an apology article. Like the manes who do that expect zero, none, blank from me saying oh I feel bad, or that must be hard.
