

Bud this is stolen.

How?

I used Google lens and I found the original artist on Devianart.

Then to make sure further, I used Google Gemini AI and yep, it's stolen art. You stole it from some random artist on Devianart.

And to make it worse, you said that it's YOUR art. Plus there's a signature at the bottom. I'm sorry mate but can you take this down? If you don't I'll just report it.
