

Microscope arrived early!!!

I will say, I did not expect cells to look like that. I mean, I kinda did because I learned it in school but like, the cells I was looking at were blue cells and blah blah blah blah blah blah blah blah blah and I'm like WOW THATS SO COOL and there's also blah blah blah blah and stuff.

If you wanna check it out yourself, it's called the Juniorscope from HSL SCIENTIFIC. Trust me, you'll be impressed.

I'm waiting for my mom to get home from her interview so that I may draw a blood sample from myself and look at my blood cells. Yes. I will do that.

Also there's a phone holder on it so I'll take a screen shot and email it to myself then apply it as my profile picture on notability, so all of notability may know what my blood looks like :)

(If my mom lets me.)
