Video game fans are used to bugs in the game, physics that don't make sense, and environments that don't quite seem possible. But this blurred image went way too far. Designers of the *Legend of Zelda* made link weigh exactly 7 apples and 2 spicy peppers and we feel so weird about it.

According to this scale, Link weighs roughly 4 pounds. He's been saving princesses, journeying, and fighting bad guys while weighing the same as a can of soup. That's amazing, but Link what are you doing?

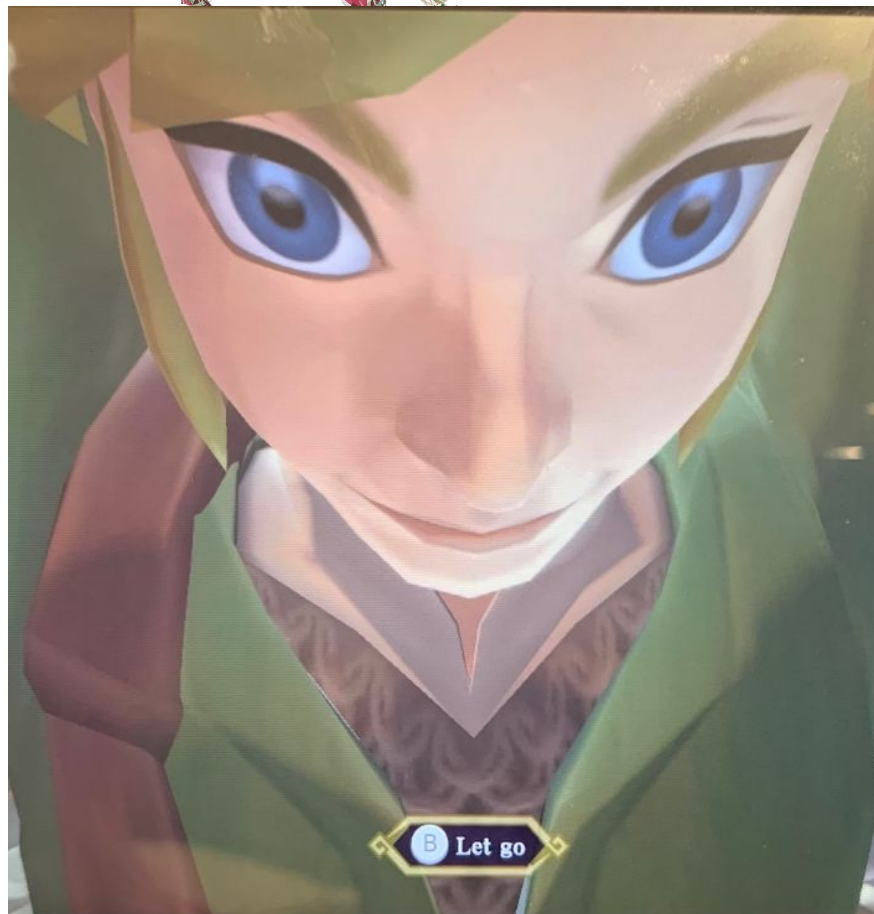

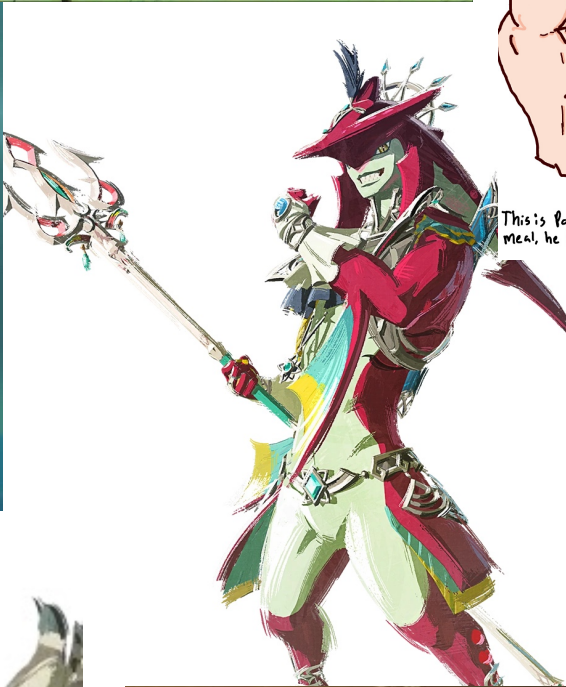

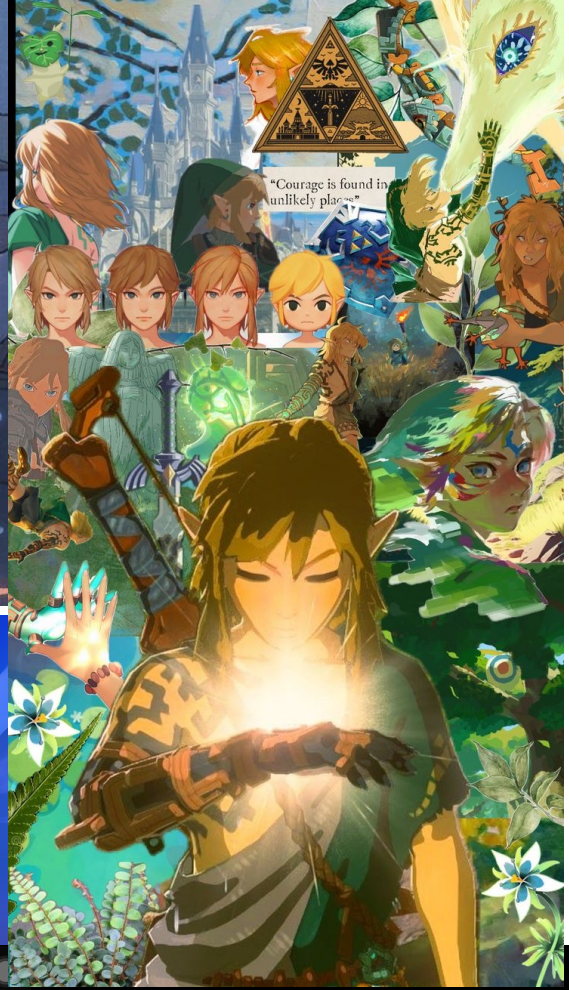

POWER TIEN

This is Power Tien, Secret identity is Link. Whenever Link eats a healthy meal, he becomes Power Tien and gains incredible strength. He is the guardian of Hyrule.
