

Warning!

tornado nearby!

tornado
picture

What a tornado is
a tornado is something made
from dust and air that
can damage and tear
things down.

How to stay safe

Go into a room without windows
or down stairs so it will be
harder for the tornado to get
there. There will be a
tornado watch to let you
know there might be a tornado.
After the tornado is over
you can go back but you might
wanna watch if it comes back.

Damage

A tornado can destroy
anything. It can cost
a lot of money to fix.

Notes of research

- tornadoes can break a lot of things
- tornadoes can start at anytime anywhere
- a tornado can last a long time
- tornadoes have been in all the states of America
- before a tornado theres a watch

Damage

It could cost a lot of money to fix damage that the tornado made

- tornadoes start by high winds

How to stay safe

- go to your basement or into a room without windows
- Make sure you watch the tornado warnings

- A tornado is something made from high winds it forms together and creates a tornado.
