full body

A bit of backstory:

She comes from Europa (like the moon) Her ship to another planet (not Earth) broke down and crash landed on Earth. The scientists took her in, and to avoid being experimented on, she became a scientist. She hates the experiments and considers trying to stop them, but she's too afraid and unexperienced to try. She's very good at hiding her emotions tho, cos she always has a poker face or meh face on despite the fact that she always feels so angry at the scientists.
