

My keyboard autocorrect:

The first time you hear 🦻 the phrase is a word I say and the last word you use it in a speech 🎤 you say it to say is that it's the first time I've been hearing the term for it since I've had to spell the words I think 🤔 but it was just an excuse not a excuse I think 🤔 and the last sentence I wrote it is not my name but it sounds so much more complicated to say in this context lol 😂 but it makes it so funny 😂 so much to hear 🦻 that now that I'm a kid 🧒 now I just want a new NEW song 🎧 and it's just the word so many things that make it sounds weird and it's like 👍 and it feels weird to hear 🦻 a little too lol 😏.
