the beatles are better than weezer in every  
way imaginable;

they invented metal with Helter Skelter,  
blended genres like no one had ever done  
made (imo) the greatest album of all time,  
Abbey Road,  
wrote hundreds of songs - despite breaking up the  
band while all still in their 20s!  
brought British music to the US  
made the first mainstream sound collage (revolution 9),  
had 3 elite singer/songwriters  
published 2 albums a year for most of their time as a band
