

This is a rant against the CountryHumans fandom.

This fandom is generally bad because these are real nations and real countries, not intended to be taken as "cute characters", because they were supposed to be the foundation of our world. Another reason is because there are a lot of bad things that have happened in history as in war between countries terrible things that happened within countries, that shouldn't be taken lightly, or as a joke. People will ship nations with each other because they think it is cool but it's not. One example is they make fanart of Russia and things and ship Russia with people, and when in reality Russia is responsible for a war and terrible things are happening to Ukraine because of Russia.

CountryHumans is utilizing countries by stereotyping, appropriating, or fetishizing certain countries. The CountryHumans Fandom has been hated from the creation, because of the characters: Third Reich, USSR, N*zi, and other controversial characters.

The fandom also tends to have toxic traits. They are guilty of nsfw, racism, ect.

One of the main problems is that the fandom loves shipping nations, and most of them have toxic relationships in reality. They also disrespect nations and know nothing about history. They do whatever they want, they don't give a crap if they're being offensive or not because they're absolute dunces.

There are some ships that are so awful that I don't want to mention, and I'm pretty sure you already know which ones I'm talking about. Also, some people in the fandom are just plain racist because they made a comic where some country started drama with their favorite countryhumans character or OC, or they just read some crappy fanfiction that probably included tons of racial things.

These people don't know anything about the countries, and their "stereotypes" couldn't be any worse. They're not even correct, just their terrible "headcanon" that they shouldn't be allowed to share because they're just offensive. And let's not forget the fact that the only thing in history that they're aware of are the two world wars, which is mostly the second one. Despite the fact that these world wars were the only things they were aware of, they still knew absolutely nothing about them and didn't even bother to do some research about them.

That's all for now. If you have a response or question, @ me in a note and I will read and respond. Best wishes if your not part of the fandom.
