

# Koriorph

Made by: Legorathalos14

Tier 3 Terrestrial carnivore

Concept: tar, pits, skeletons,  
skullcrawlers and shape shifters

**Koriorphs are unusual creatures with the ability to go invisible to the eye in a second and can let some of the tar from their bodies drip of to catch prey which they pounce on and devour from the dark.**

**Yessir new creature,  
this guy is more  
recently made and  
pretty goofy at that.  
What a coincidence  
that I came up with  
this when I was  
listening to more  
depressing songs in my  
playlist.**
