

Are we living
in a simulation ?

FB วันนี้คุณปล้มเรียนอะไร

Artificial Intelligence - Games

mainstream AI

Monte Carlo Tree search

procedural content generation

Progress in Deep Learning → cognitive service

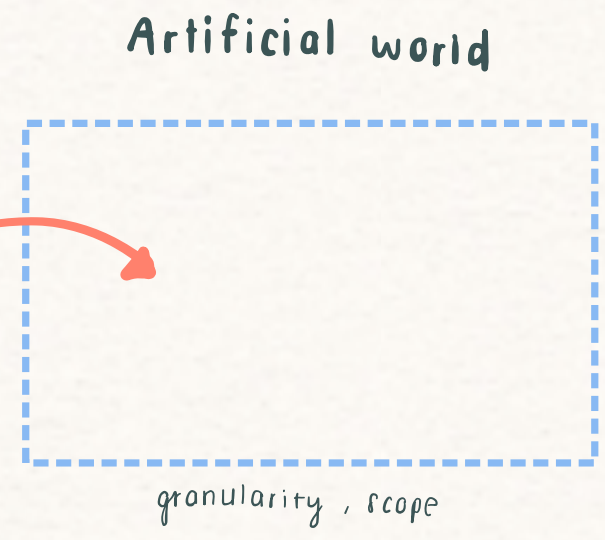

computing Power

replicate Human brain function

Post-Human
Artificial Human mind

Artificial mind

replicate conscious human mind.

Reality

Real-world
Physical existence

- complexity
- (?) infinite state

Human activity

- interaction
- transaction

Agent Human Level intelligence

Brain; High efficient information processing

under scarcity
limited competition

Creativity

Evolutionary

DNA
[Human software]

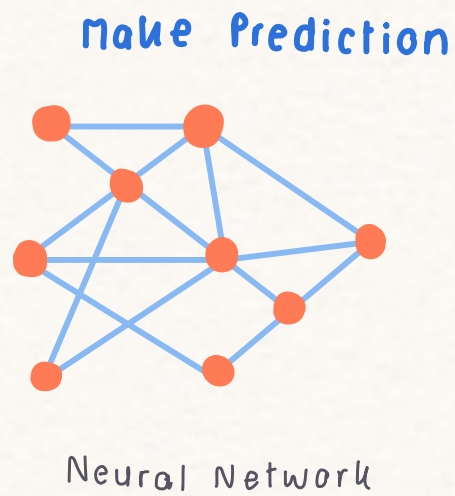

Brain "Difference Engine"

information processing machine

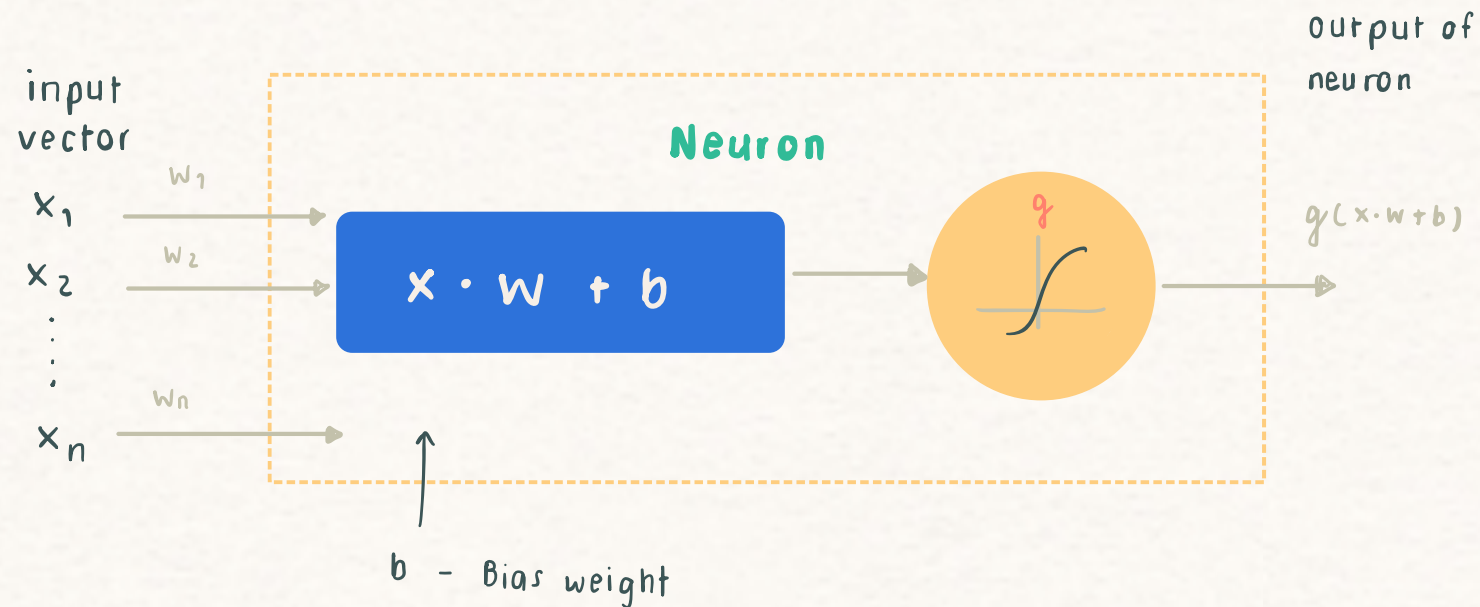

drive Behavior → organism's survival

causally drive

Computational intelligence

Learning \approx maximize utility

intelligence ; emergence phenomena

Measure of goodness

๖ แต่:คน ไม่เหมือนกัน

๖ Search space

Search - Algorithm

Utility Function

measure of rational choice

Search - algorithm

- Economics - Game Theory

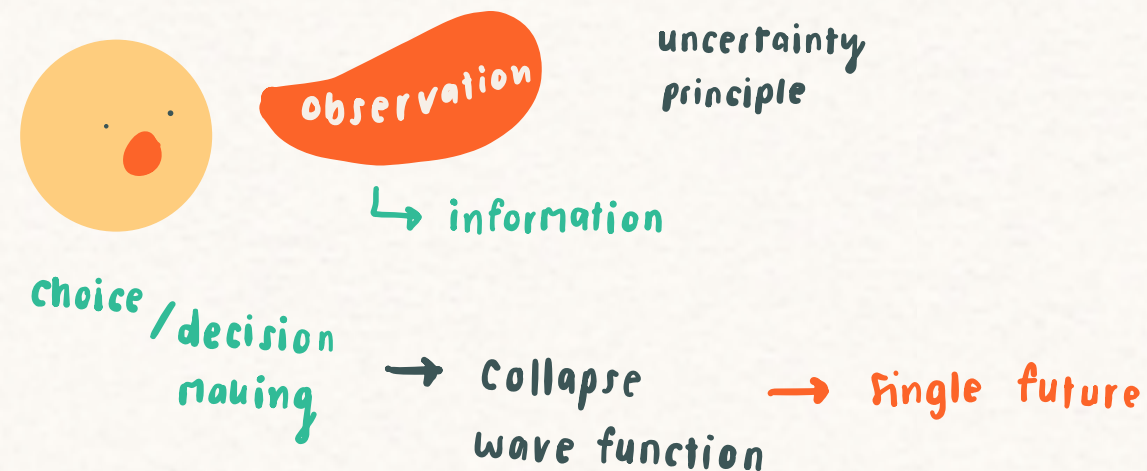

↳ mechanism design

- Market mechanism

↳ มาตรการควบคุม

Quantum Probability wave

Wave function collapse (?) By consciousness

Reality

virtual Reality

- finite state spaces

"Quantum Field"

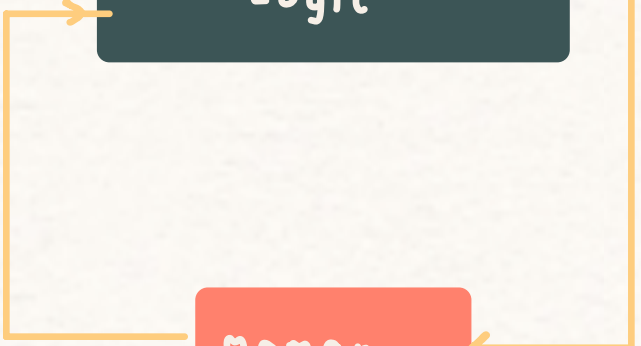

Computational power \rightarrow finite state machine
virtual environment

inputs

Combinational Logic

Outputs

? System dynamics

Real-world Physical existence
- complexity
(?) infinite state

NP-HARD

computational complexity

non-deterministic polynomial time

optimization problem

Utility Function

ψ Entropy — \mathcal{E} Energy cost function

fundamental characteristic of games

Observability

Characteristic ที่เกี่ยวข้องกับ stochasticity

information : game state ที่สังเกตได้

Perfect information

Hidden information

- only Partial observability

? depend on Question

4 Common elements

Representation

interaction - media
- dynamic

conflict

- conflict arises naturally from the interaction of a game.

* conflict need not be violent Safety

Stochasticity (non-deterministic)

Game
↳ Pseudo-random number generator

Common game game mechanics

deterministic

cause → determine → effects

+ combination

stochastic element

increase complexity

- การ → แร่

→ เกล็ด

เกล็ดแบบของแร่

Pac-Man

Non-deterministic arcade game

Boss ส่วน mechanism

interface : representation
information

Time Granularity

Time Domain $(T; \leq)$

The set of primitive temporal entities used to define and interpret time-related concept.

discrete time domain

Real-world Dynamics Systems

↳ complexity

non-deterministic

increasing time granularity

* information and communication

Time Granularity

Electricity Markets

High computational power
