

**Hi guys! I can't follow my followers right now because for some reason it won't let me follow people, and click on certain stuff. I believe this is happening to other people as well, I'm pretty sure notability is trying to fix it. Please comment down below if you've followed me, but I didn't follow back! Btw if you follow me now, just tell me in the comments so when this is fixed, I'll go follow you!**
