

What is wrong w/ my notability???

i am really hating this new update

but now that i think abt it, the worst part of

it was the top part, when your writing a note. I don't know why I started writing in cursive but I'm up for it.

but... ^(anyways) anyways, honestly, I'm starting to grow on it... I mean I'm just playing around w/ it and I realized that you can delete and change the colors — I mean duh, but I didn't realize that Notability would save it... I'm dumb...
