

best order to figure out:

- median
- mode
- range
- mean

Mode

most common number

if all numbers have the same amount,
there will be no mode

Median

the middle when the numbers are in order

(if there are 2 numbers
in the middle, its the one inbetween
them)

Range

subtract the smallest from the largest
number

Mean

the result of all the numbers added together, divided
by the range
