Im a lil weird in my head and I currently feel sad

I dont use typical popular social media
I thrive off of neo social media, like the gallery and scratch (I stopped using that ages ago tho)
But my brain likes sorting everything.
I have 12 subjects on Nota, 2 of which have only 1 note

And I cant sort my nota posts
so I feel disorganized and messy ÷
And I feel like Im "selling out" too
I feel like Im posting worse content
Like notes of just words
And idk
I feel gross
Whats wrong w/ me lol

Im so sensitive

I feel so gross about normal stuff

OMLLLL

Whats wrong with meeeee

I want to do this:
