

How to draw light sources!

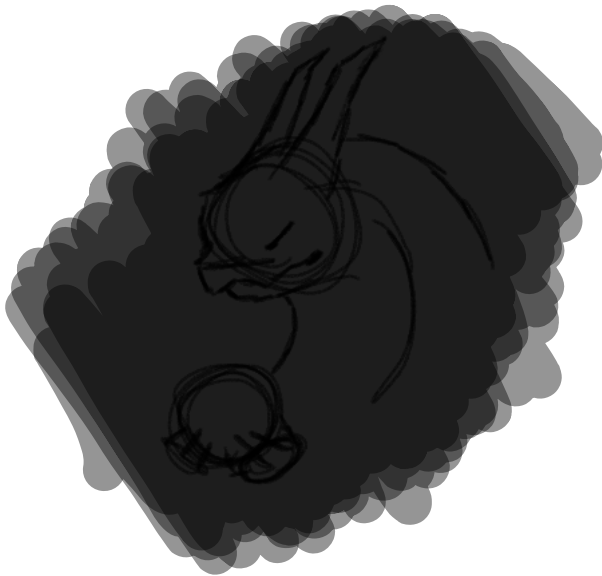

1. Draw your subject & light source.

2. Use the black highlighter to make everything dark

3. Choose the color of your light source & set pencil size to 6

4. Color your light source.

5. add reflections of subject.

6. add details & shading.

↑ don't forget to add hands back in!

7. done!

Bonus: When making light, choose your darkest color first, then go lighter.
