

Separating Mixtures

Draw a line from the process to its correct description.

Evaporating and Condensing	Separates insoluble solids from liquids
Decanting	Separates two liquids which have different weights
Magnetism	Separates different sized solids
Filtering	Separates soluble solids from liquids
Sieving	Separates iron and steel from non magnetic materials

Write in the process used to separate each mixture.

Mixture	Process
salt + water	Simple Distillation
sugar + water	Fractional Distillation
rice + pasta shapes	Sieving
sand + water	Filtration
flour + rice	Sieving
paperclips + sawdust	Magnetism
