

# Discussion Preparation

Name \_\_\_\_\_

Date \_\_\_\_\_

Discussion Topic \_\_\_\_\_

**After reading and annotating the three required articles and at least one optional article, answer the following questions.**

**What is cloning? What is one example of a clone?**

**What is the difference between therapeutic cloning and reproductive cloning?**

**Why are scientists skeptical of cloning?**

**You've read about some of the dangers of cloning, why is it so dangerous?**

**What are some of the issues cloned animals can experience? Give me three examples from the article.**

**What are some reasons someone would want a cloned baby?**

**Choose the three most important questions you have from the texts to ask during the seminar.**

**Questions-**

Example) What is your opinion, should human cloning be banned in the United States?

1.

2.

3.

**During Seminar-**

**On-Task Behavior-** *Prepared for discussion, cooperates with others, productive group work*

4                      3                      2                      1

**Contribution-** *Use evidence from the text to support your claim/opinion, ask clarifying questions, encourage others*

4                      3                      2                      1

**Social Interaction-** *Maintain eye contact, take notes, speak clearly, sit still*

4                      3                      2                      1

**Final Grade**

Teacher Use Only

\_\_\_\_\_/12

**After Seminar**

State something you did well today
